WASTE & WATER is a company with the ambition to implement innovative techniques for the Environmental Sector, having acquired relevant experience from France, a country that is a frontrunner in the administration of environmental systems.

The company is staffed with engineers having extensive experience on environmental issues and cooperates closely with VEOLIA WATER SOLUTIONS & TECHNOLOGIES, a world leader on environmental issues. The company also cooperates with large engineering offices, construction companies and manufacturers of specialized equipment.

WASTE & WATER is predominantly involved in the management of Water, Waste Water and Waste Systems and is contracted by:

- Private Companies
- Public Authorities and Organizations
- General Contractors
- Industrial Firms
- Tourist Companies
- Shipping Companies

The company provides complete engineering, design and consultancy services regarding any environmental issue/problem.

Specialized technical personnel are always available to listen to your problem and provide the best possible solution, irrespective of the size of your project.

*Consider **WASTE & WATER** your own personal advisor and trust the solutions that it provides.*

WASTE & WATER provides:

TURN-KEY PROJECTS

Our company designs and constructs the following environmental projects:

- Industrial waste water treatment plants
- Municipal waste water treatment plants
- Industrial water production units
- Refineries of potable water
- Waste recycling and recovery plants

We offer a complete project package - from the performing the basic design and acquiring the requisite legal permits to commissioning and start-up of the installation.

OPERATING AND MAINTENANCE OF INSTALLATIONS

We provide complete services pertaining to the operation and maintenance of industrial installations regardless if they have been constructed by us or not. For the most part, these services involve waste water treatment plants, water production units and waste recycling plants. For this type of outsourcing services, our company is committed to operating the installation in accordance with the foreseen legal mandates and specifications. To this end, our company provides the best warranties through the utilization of its experience from abroad.

ENGINEERING & CONSULTING:

For most applications, environmental equipment must be specially designed to meet stringent criteria and provide reliable output. WASTE & WATER undertakes a detailed examination of all the parameters with the objective of providing the most favorable technical and financial solution.

Further, consultancy services from specialized personnel for any environmental problem are offered, specifically:

- Locating specialized personnel and firms overseas
- Assistance in business scheme formation
- Preparation of dossiers for EEC programs and related activities
- Preparation of Public Tender dossiers
- Market search for environmental issues

ENVIRONMENTAL SERVICES

Complete services regarding the following are provided:

- Collection and transport of urban waste
- Collection and transport of industrial waste
- Neutralization and disposal of biological sludge
- Services involving the emptying of cisterns

The aforesaid services are performed by specialized staff and modern equipment.

**Waste
Water**

WASTE & WATER also provides:

EQUIPMENT

In cooperation with leading manufacturers in the industry, WASTE & WATER supply and install any type of specialized equipment in order to provide optimal environmental solutions. We offer expedient supply and specialized after sales service for all our equipment.

The following are indicative examples:

WATER TREATMENT

- Desalination plants
- Water processing systems (filtration, activated carbon systems, hardness reduction, reverse osmosis, etc.)
- Specialized systems for extra pure industrial water production
- Products for the cleansing of water networks and storage tanks
- Products for the cleansing of water wells and boreholes
- Consumables (polymers, special products for closed-system cooling towers, etc)

WASTE WATER TREATMENT

- Waste processing units (compact, conventional, tertiary treatment with the possibility of reutilization of the processed waste)
- Evaporation units for special applications (steel and paint industries, special waste)
- Biogas production units for industrial applications

WASTE MANAGEMENT

- Equipment for the compaction and transport of solid waste
- Equipment for the recycling of urban and pre-selected waste
- Transporting Equipment
- Equipment for the cleansing of ports/harbors and lakes

COOPERATION

VEOLIA WATER SOLUTIONS & TECHNOLOGIES

Waste & Water has developed cooperation with VEOLIA WATER SOLUTIONS & TECHNOLOGIES, the world leader in the processing of water and waste water, for the transfer of technology and applications in Greece. The result of this cooperation is the construction of the new technologically advanced waste water treatment plant for the NIKAS S.A. factory at Agios Stefanos, Athens, as well as several other proposals to the local district authorities.

OTHER COOPERATIONS

Further to the aforementioned cooperation, our firm cooperates with specialized equipment manufacturers like BIBKO (recycling concrete systems), ECOCEANE (port cleaning vessels), JSB CONSTRUCTION (waste compaction equipment), EQUATER (press-containers, loading and unloading systems), HYDROVIDE (special waste water vehicles) and more.
